Non-irritant

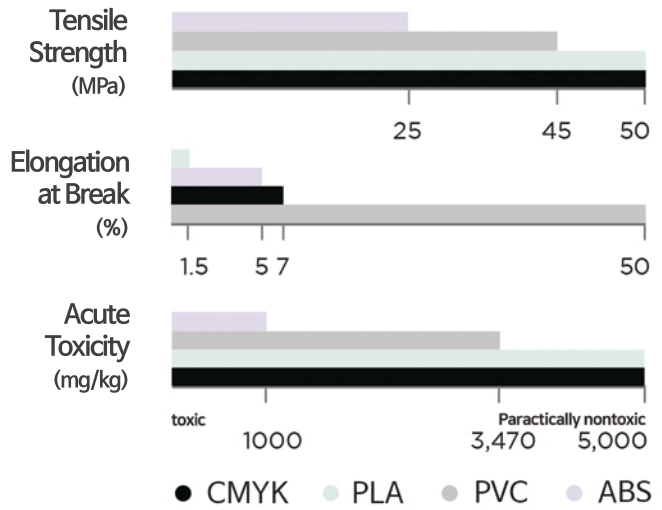

General Nontoxic CMYK

Code **CUKL22C / M / Y / K / W / CL**

Color ● Cyan ● Magenta ● Yellow ● Black ○ White ○ Clear

*Carima CMYK/ PLA Filament for 3D Printer/ PVC Plastic/ ABS Filament for 3D Printer

Carima’s CMYK resin, consisting of five colors, is a nontoxic mixable material, allowing users to freely combine colors. The liquid resin has been tested and classified as non-irritant and no harmful chemical substances were detected, which makes it suitable for educational use and printing children’s toys. CMYK resin can also be used to print figures and models due to its high precision and strength.

* We recommend the use of Carima's eco-friendly cleaner, RD-229.

General Nontoxic CMYK	
Recommended Field	Figures and Models
Tensile Strength	50MPa
Youngs Modulus	1140MPa
Elongation at Break	7%
Shore Hardness	83D
Viscosity	650cP
Skin Irritability	Non-irritant (Primary Irritation Index : 0.2/8.0)
Acute Toxicity	Oral LD50 > 5000mg/kg
Odor	Odorless
