

# WASH<sup>+</sup>

## A Versatile Cleaning Solution Tailored for Your Dental 3D Printing Workflow

### Crafted for Flexibility

Made to fulfill all your washing requirements.

### ±5 Mins Washing Cycle

For dental professionals who demand quick and easy cleaning solutions.

### Fits 200 Washing Profiles

Conveniently organize and store each of your custom wash profiles.

### Robust Metal Exterior

Enhance durability and long-term usability.

### Intuitive UI

Easy-to-understand interface that helps simplify your dental workflow.

# Versatile Dual Tank System

Engineered to enable dental professionals to use various washing methods between tanks seamlessly.

## 1st Method

### Dirty & Clean IPA Wash

A two-stage process, starting with the initial cleaning in cloudy IPA and concluding with a final cleaning in clean IPA. With this approach, you can effortlessly optimize IPA/alcohol usage, promoting better recycling and overall efficiency.

## 2nd Method

### FDA & Non-FDA IPA Wash

Conveniently fulfill two distinct cleaning requirements in a single wash cycle. This approach is perfect when working with FDA-biocompatible dental parts that demand a separate IPA wash.

## 3rd Method

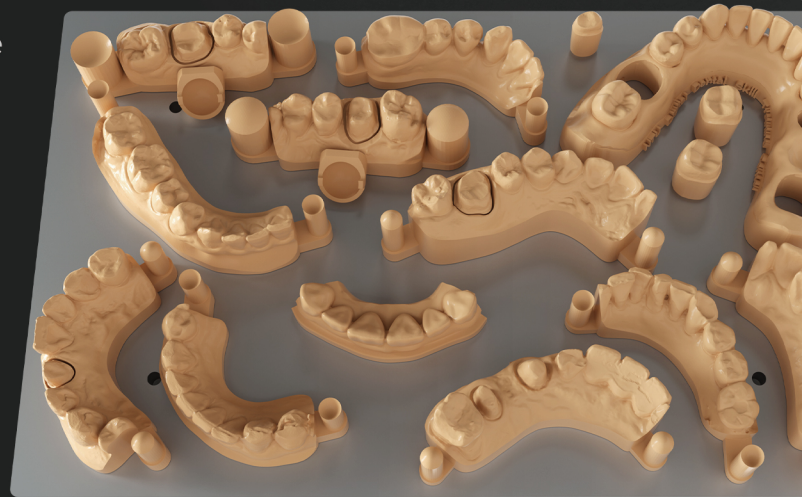

### 2x Wash Output

With a dual tank that fits a 9.3” building plate, you can clean up to 24 dental models in a single wash cycle, easily doubling the wash output a single washing machine brings without any additional effort.

## Complete Wash Out in ±5 Minutes

Wash+ provides both speed and reliability, ensuring the complete removal of resin residue from your printed dental models in just five minutes or less.

## Just Set It, Save It, Then Tap Start!

You don't have to manually input each resin washing profile whenever you want to start a wash cycle. With the ability to store 200 washing profiles, you only need to set it once, save it, and then select the name of your resin to begin your cleaning process.

## Technical Specifications

<b>Washing Tank Size</b>	L25 x W18.5 x H25 cm
<b>Wash Volume</b>	L20 x W12.5 x H10 cm
<b>Liquid Capacity</b>	Up to 7L per Tank
<b>User Control</b>	5" Touch screen Capacity up to 200 washing profiles
<b>Solvent Compatibility</b>	Isopropyl alcohol (IPA) 99% Alcohol 95%
<b>Product Dimension</b>	L28.5 x W39 x H40 cm
<b>Rated Power</b>	Max 48 W
<b>Input Voltage</b>	24V DC : 2A
